

9 au 11 octobre 2023, Institut des Systèmes Complexes, Paris

FAIR Bioinfo 2023

Les principes FAIR dans un projet de bioinformatique

Conclusion

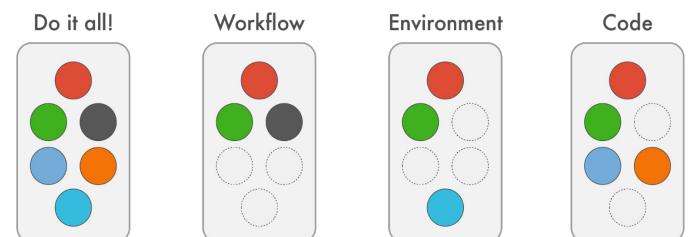

- Introduction to FAIR & Open Science (webinaire, questions)
- Project management (data, repository)
- Traceability with notebooks (jupyterlab)
- History management (Git)
- Introduction to encapsulation
- Environment management (Conda)
- Containerisation (docker)
- Share & disseminate, code & project (GitHub)
- HPC : cluster (Slurm)
- Analysis workflow (snakemake)
- HPC : containerisation (singularity)
- Conclusion

- Introduction to FAIR & Open Science (webinaire, questions)
 - Project management (data, repository)
 - Traceability with notebooks (jupyterlab)
 - History management (Git)
- e-labbook
- Introduction to encapsulation
 - Environment management (Conda)
 - Containerisation (docker)
 - Share & disseminate, code & project (GitHub)
- code development
- HPC : cluster (Slurm)
 - Analysis workflow (snakemake)
 - HPC : containerisation (singularity)
- HPC
- Conclusion

 - Conclusion

Other use cases?

- Project management (data, repository)
- Traceability with notebooks (jupyterlab)
- History management (Git)
- Environment management (Conda)
- Containerisation (docker)
- Share & disseminate, code & project (Git***)
- HPC : cluster (Slurm)
- Analysis workflow (snakemake)
- HPC : containerisation (singularity)

Findable

Accessible

Interoperable

Reusable

Automation

Manual command lines

Write a shell script

Use a workflow manager

Tests and continuous integration (*)

User analysis (trial-and-error)

Offer a GUI (eg. with R-Shiny) (*)

Save and re-import choices (*)

Softwares

Local installation

Package manager

Conda environment

Image / container

Virtual machine (*)

(*) not in the course

Reproductibilité

Versionner
Partager
Archiver

Créer un
environnement
virtuel

Installer des
outils par un
gestionnaire

Créer un
script
d'analyses

Déporter
l'analyse sur
un serveur

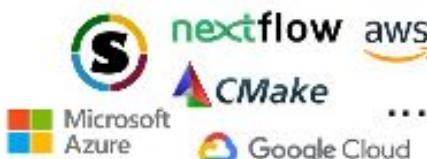

Portabilité
de
l'exploration
des résultats

Éditer un
rapport
d'analyses

Alternative tools:

Reproducibility to the exact bit?
container uses some resources of the
support machine
⇒ version control of the env.
(Nix, Guix)

HPC and parallelization?
loss of computational order,
multithreading, identical
hardware?

⇒ ...

Pedagogical team (our guardian angel): Hélène

IFB Core Cluster taskforce: Julien, Gildas, and all those who provide in the shadows

Helpers: Emilie, Marie, Lucie
