

Use case 2

Running code reproducibility

Profile: about the code execution reproducibility

Aim: controlling the code execution and gain into its distribution to the community

- distributing your code means not only **sharing the code**
- but also distributing the **execution environment**

Schedule:

1. environment management with  **CONDA**
2. Code distribution: software forges ( pages), releases, licenses & DOIs
3. execution encapsulation with a  **docker** container
